

Summer Institute on  
**BOUNDED  
RATIONALITY**  
Rethinking Behavioral Economics

**Apply by March 15, 2020**

We are delighted to announce that the 19th Summer Institute on Bounded Rationality will take place on June 09–17, 2020, at the Max Planck Institute for Human Development in Berlin, Germany.

The Summer Institute brings together talented young researchers and renowned scientists from around the globe and aims to spark a dialogue about decision making under the real-world constraints of limited time, information, and computational power. The Summer Institute offers a forum for young scholars from various disciplines to share their approaches, discuss their research, and inspire each other. The program will cover the fundamentals and methodology of bounded rationality and spotlight recent findings.

This year's Summer Institute will focus on behavioral economics in the light of bounded rationality and interdisciplinary research on human decision making. It is our pleasure to announce that Giovanni Dosi, Professor of Economics at the Scuola Superiore Sant'Anna in Pisa will give the Joachim Herz Keynote Lecture, and Andreas Georgiou, economist and former President of the Hellenic Statistical Authority, will hold the Heroes of Science Keynote Lecture.

On behalf of the Directors of the Summer Institute, Gerd Gigerenzer and Ralph Hertwig, we invite young scholars of decision making from all fields to apply. Participation is free, accommodation is provided, and travel expenses will be partly reimbursed.
